

IADC WELLSHARP™ WELL CONTROL FOR SUBSEA OPERATIONS

This course curriculum is designed for the Oil and Gas Operator Representative and Service Company Equipment Operators involved in Workover Operations primarily responsible for the Subsea operation processes of well control. The curriculum identifies a body of knowledge and set of job skills that can be used to provide well control training for Well Servicing Subsea operations.

The Subsea Supplement is only available to those trainees successfully completing the Oil and Gas Operator Representative and Service Company Equipment Operator course. If the trainee does not enroll in the Subsea Supplement at the same time as the Oil and Gas Operator Representative or Service Company Equipment Operator course and returns to take the supplement at a later date, evidence of completion must be submitted to the training provider at the time of enrolling in the course. If the trainee does not have a valid Well Servicing Oil and Gas Operator Representative or Service Company Equipment Operator course certificate, the training provider shall not enroll the trainee in the Subsea Supplement course.

Course Curriculum:

- General Operations
